

2025 ENVIRONMENTAL IMPACT REPORT

Twisted Luck Sustainable Solutions

INTRODUCTION

"Starve the Landfill...Feed the Soil"

Twisted Luck Sustainable Systems transforms organic waste from local businesses, farms, and households into nutrient-rich compost through managed aerobic decomposition. In 2025, we diverted over 316,000 pounds of organic material from landfills by partnering with coffee shops, restaurants, stables, landscaping companies, and community members. Through convenient collection schedules and carefully monitored composting processes, we're closing nutrient loops and proving that what others call "waste" can become valuable soil that regenerates our community.

POUND FOR POUND

- A pound that won't produce methane in a landfill
- A pound of nutrients returned to the earth instead of buried forever
- A pound that demonstrates composting isn't just possible—it's practical and powerful
- A pound that proves communities can create measurable environmental change
